**Natural Product Reports** is a journal of critical reviews, published bimonthly, which is intended to foster progress in the study of natural products by providing reviews of the literature that has been published, during well-defined periods, on the topics of the general chemistry and biosynthesis of alkaloids, terpenoids, steroids, fatty acids, and O-heterocyclic, aliphatic, aromatic, and alicyclic natural products. Occasional reviews provide details of techniques for separation and spectroscopic identification, and describe methodologies that are useful to all chemists and biologists who are actively engaged in the study of natural products.

Articles in **Natural Product Reports** are commissioned by members of the Editorial Board or accepted by the Chairman for consideration at meetings of the Board.

Natural Product Reports (ISSN 0265-0568) is published bimonthly by The Royal Society of Chemistry, Thomas Graham House, Science Park, Milton Road, Cambridge CB4 4WF, England. 1992 Annual Subscription Price E.C. £222.00, Overseas £250.00, U.S.A. \$474.00.
