RCA ANNOUNCES NEW ENGINEERING OPENINGS FOR PROJECT BMEWS

BMEWS, the Ballistic Missile Early Warning System Project, offers unique opportunity for engineering leadership.

There are openings for experienced engineers in:

- Engineering Management
- Project Engineering
- Circuit Design Engineering

New long range assignments, vital to national security, offer every opportunity for growth. Excellent starting salaries. BSEE or BSME required, reinforced by several years' engineering experience in areas such as:

- Heavy Ground Radar Systems
- Digital Computer Systems
- Communications Systems
- Data Handling Systems
- Electronic Displays
- Systems Integration

If you enjoy working in small top-level engineering groups, please write to:

Mr. Robert Vincent
RCA, Dept. BM-9B
1809 Bannard Street, Riverton, N. J.
TAlmadge 9-3800

Your resume will receive immediate review and prompt action.

RCA SERVICE COMPANY
A Division of Radio Corporation of America

Meetings

Thermal Properties

THERMAL properties of gases, liquids, and solids are the topics to be covered at a symposium to be held February 23-26 at Purdue University. It will be sponsored by the Heat Transfer Division of the American Society of Mechanical Engineers in cooperation with the ASME Central Indiana Section and the Purdue University Thermophysical Properties Research Center.

In all, 46 papers will be presented at the symposium's 9 sessions. Surveys of the present status of theoretical and experimental work on transport properties will be given in the opening sessions. The remainder of the program will be devoted to the reporting of new data on transport properties and to papers dealing with PVT data and equations of state, thermodynamic properties of gases and liquids and of boron compounds, high-temperature transport properties of metals and ceramics, and high-temperature thermodynamic properties of gases. The second annual conference of the Thermophysical Properties Research Center will be held on Tuesday evening, February 24. TPRC director Y. S. Touloukian will report on the work of the Center and C. W. Beckett of the National Bureau of Standards will speak on the subject of high-temperature thermal properties. The Wednesday evening symposium banquet will feature a speech by Allen V. Astin, director of NBS, who will consider the question, "How Critical Are Critical Tables?"

Copies of the program are available from ASME, 26 West 39th Street, New York, N. Y., or from the general chairman, Dr. Y. S. Touloukian, School of Mechanical Engineering, Purdue University, Lafayette, Ind., from whom further information is also available.

Analytical Chemistry and Applied Spectroscopy

THE tenth annual Pittsburgh Conference on Analytical Chemistry and Applied Spectroscopy will be held March 2-6 at the Penn-Sheraton Hotel in Pittsburgh and will occur during the bicentennial anniversary of the city's founding. In addition to the program of 160 technical papers which has been scheduled, an exposition of recent developments in laboratory equipment and instruments will be presented and tours of the US Steel, Westinghouse, Mellon Institute, and H. J. Heinz research laboratories are being arranged.

The Pittsburgh Spectroscopy Award for outstanding achievement in this field will be presented during the meeting to Bourdon F. Scribner of the National Bureau of Standards. An employment bureau will be in

Artist's concept of the guided-missile cruiser, U.S.S. Long Beach, the U.S. Navy's first nuclear-propelled surface warship, now under construction by Bethlehem Steel's Quincy, Mass., shipyard.

SHIELDING ENGINEERS for Naval Nuclear Power Plant Development

Principal duties involve: design of primary and secondary shielding; performance of special radiation studies pertaining to operation and maintenance of nuclear power plants, development of computer programs, monitoring and health physics procedures.

The Central Technical Department of Bethlehem's Shipbuilding Division, an experienced organization recognized for its technical achievements, offers unusual opportunities for qualified shielding engineers to participate in our interesting and dynamic nuclear power program.

Minimum qualifications are:

1. BS in Engineering or Physics. 2. MS in Nuclear Engineering or equivalent. 3. At least two years' experience in design of shielding for mobile nuclear power plants or equivalent. 4. U. S. citizenship.

If you would like to make full use of your professional training in creative engineering, enjoy easy commuting and be close to New England's educational and recreational facilities, by all means write to us. Your inquiry will be considered confidential and acknowledged promptly.

Please address your résumé to:

BETHLEHEM STEEL COMPANY

Shipbuilding Division

CENTRAL TECHNICAL DEPARTMENT

Quincy 69, Massachusetts

Attention C. H. Goldthwaite, Assistant Manager

SCIENTISTS and ENGINEERS

Dynamic new subsidiary of **Ford Motor Company** is now in initial stages of expanding military and commercial programs.

Positions are at ASI's interim Glendale facility and will also be at ASI's new Research Center now under construction at Newport Beach in Southern California. Work in an intellectual environment as stimulating as the locations are ideal—close to most of Southern California's cultural, educational, and recreational centers.

Outstanding growth opportunities for qualified engineers and scientists who are U. S. citizens are open in the following fields:

OFFICE OF ADVANCED RESEARCH

THEORETICAL RESEARCH — Hydrodynamic and radiation processes in tenuous gases at very high temperatures, ionization produced by soft X-radiation, hydrodynamics of solids at high pressures including studies of equations of state, infrared properties of the atmosphere and of hot gases, conversion of chemical energy into sound and the condensation rate of supersaturated vapors. Theoretical physicists are needed to work in these fields. Specific experience is not necessary. However, a general background in theoretical and mathematical physics is required.

You are invited to address inquiries to M. H. Johnson, Advanced Research Staff at our Glendale, California address.

Other unusual opportunities are open for qualified engineers and scientists in the following areas:

SPACE TECHNOLOGY DIVISION

Astrodynamics • Space Environment • Theoretical Physics • Electronics • Radar • Information Links • Automatic Controls • Mathematics • Propulsion Research • Combustion • Materials • Aeromechanics

COMPUTER DIVISION

Input-Output Equipment • Storage Units • Display Devices

TACTICAL WEAPON SYSTEMS DIVISION

Aero-Thermodynamics • Aero-Chemistry and Propulsion • Astronautics

Qualified applicants for the above three divisions are invited to send resumes and inquiries to Mr. K. A. Dunn, 1234 Air Way, Bldg. 21, Glendale, California. Phone CHapman 5-6651.

AERONUTRONIC SYSTEMS, INC.

a subsidiary of FORD MOTOR COMPANY
NEWPORT BEACH, GLENDALE, SANTA ANA
AND MAYWOOD, CALIFORNIA

operation throughout the conference. Additional information may be obtained from the general chairman, Dr. Edwin S. Hodge, Mellon Institute, Pittsburgh 13, Pa.

Theory of Fluid Flow Through Porous Media

SINGLE and multiphase fluid flow in porous solids will be considered from a theoretical point of view at a conference to be held March 23-24 at the University of Oklahoma at Norman under the sponsorship of the University's School of Petroleum Engineering. The proceedings will be published and distributed to all who attend. Further information may be obtained from the conference chairman, Prof. Charles G. Dodd, School of Petroleum Engineering, University of Oklahoma, Norman, Okla.

Color

THE Inter-Society Color Council will hold its 28th annual meeting on April 1 at the Statler-Hilton Hotel in New York City. A business meeting will be held during the morning and will be followed in the afternoon by a symposium on the use of material standards for color matching. The practical problems and acceptance of material color standards will be reviewed by A. J. Benjamin, the instrumental approach will be covered by Harry J. Keegan, and the visual approach will be discussed by Hugh Davidson and Henry Hemmendinger. The guest speaker at the evening banquet will be Deane B. Judd of the National Bureau of Standards.

Advance registration blanks and further information may be obtained from the council's secretary, Mr. Ralph M. Evans, Technology Division, Building 65, Eastman Kodak Company, Rochester 4, N. Y.

Optical Society

THE 1959 spring meeting of the Optical Society of America will take place April 2-4 at the Hotel New Yorker in New York City and will be held in conjunction with the Infrared Information Symposia (IRIS) organization. This will be the first meeting to be held jointly with a group with overlapping interests and the beginning of a policy which the Optical Society expects to continue.

On Thursday, April 2, invited papers will be given on the weather-eye satellite (W. G. Stroud), the balloon spectrograph (John Strong), and the balloon telescope (Martin Schwarzschild). At a parallel session on Thursday morning, Dorothy Nickerson will speak on "Light Sources and Color Rendition". On Friday morning, April 3, there will be an invited paper on infrared detectors (Henry Levinstein) and one on measurements of the earth's heat radiation (Lewis D. Kaplan). Three papers on microscopy will be given in the afternoon by W. Lewis Hyde, Shinya Inoué, and Cecil E. Hall. On Saturday morning, a panel consisting of several OSA members who recently visited Russia will discuss "Observations on Optics in the USSR".

At a joint OSA-IRIS banquet on Thursday evening,
