PERSONALISED MEDICINE

and its Impact in the Clinic

In association with LABVOLUTION/BIOTECHNICA

ELA

HANOVER
GERMANY

7 - 8 OCTOBER

2015

Personalised Medicine and its Impact in the Clinic will run alongside the Genome Engineering track, adjacent to the BIOTECHNICA/LABVOLUTION exhibition. Each track runs for two days and is broken down into four sessions.

You have the option to attend both tracks, a single track, a single day or even single sessions. All delegates also receive complimentary access to the exhibition and ELA Advances in LabAutomation and Robotics track.

With over 600 exhibitors and 12,000 visitors expected to attend BIOTECHNICA/LABVOLUTION, this will be a great opportunity for talks between pharma & diagnostic companies, academic & institutional research, clinicians & industry stakeholders.

Confirmed speakers include:

- Kari Stefansson, Chief Executive Officer, DeCODE Genetics
- Christof von Kalle, Head, National Center For Tumor Diseases, Heidelberg
- Klaus Pantel, Professor, University of Hamburg
- Reinhard Büttner, Director, Cologne University Hospital
- Julia Stingl, Director of the Division of Research, BfArM
- Edith Schallmeiner, Global Team Director - NPT, Novartis
