Contemporary Organic Synthesis

Editorial Board

Professor G. Pattenden, FRS (Chairman), *University of Nottingham*
Professor P. D. Bailey, *Heriot-Watt University*
Professor P. J. Kocienski, *University of Southampton*
Professor C. J. Moody, *Loughborough University of Technology*
Dr S. E. Thomas, *Imperial College of Science, Technology, and Medicine*
Professor E. J. Thomas, *University of Manchester*

International Advisory Board

Professor E. J. Corey, *Harvard University*
Professor S. Hanessian, *Université de Montréal*
Professor M. Julia, *Université de Paris XI (Paris-Sud)*
Professor P. D. Magnus, *University of Texas at Austin*
Professor G. Mehta, *University of Hyderabad*
Professor K. C. Nicolaou, *Scripps Research Institute, La Jolla*
Professor R. Noyori, *Nagoya University*
Professor L. E. Overman, *University of California, Irvine*
Professor L. F. Tietze, *University of Göttingen*

Contemporary Organic Synthesis is a bimonthly journal which aims to review and provide perspective in all aspects of methodology, selectivity, and efficiency in contemporary synthesis. As well as covering all the principles and methods in functional group chemistry and interconversions, organometallic chemistry and asymmetric synthesis will feature prominently, so too will modern aspects of strategy and computer aided design, biotransformations, and protecting group protocols. Special methods and techniques, such as sonochemistry, FVP, electroorganic synthesis, and supported catalysis will be included as occasional articles, and the manner in which synthesis addresses problems and provides solutions in biology, medicine, agriculture, the environment, and new materials, will also be encompassed. *Contemporary Organic Synthesis* aims to be proactive, drawing attention to new opportunities and new directions, providing timely information to the synthetic chemist who needs to keep abreast of developments in the field.

Although the majority of articles are intended to be specially commissioned, the Society is always prepared to consider offers of articles for publication. In such cases a short synopsis, rather than the completed article, should be submitted to the Senior Editor (Reviews), Books and Reviews Department, The Royal Society of Chemistry, Thomas Graham House, Science Park, Milton Road, Cambridge CB4 4WF.

Members of the Royal Society of Chemistry may subscribe to *Contemporary Organic Synthesis* by placing their orders on the Annual Subscription renewal forms in the usual way.

All other orders accompanied with payment should be sent directly to The Royal Society of Chemistry, The Distribution Centre, Blackhorse Road, Letchworth, Herts SG6 1HN, England. 1994 subscription rate: EC £150, USA \$282, Canada £169 (plus GST), Rest of the World £161. Air freight and mailing in the USA by Publications Expediting Inc., 200 Meacham Avenue, Elmont 1103; USA Postmaster, send address changes to *Contemporary Organic Synthesis*, Publications Expediting Inc. Second class postage is paid at Jamaica, New York 11431. All other dispatches outside the UK are by Bulk Airmail within Europe and Accelerated Surface Post outside Europe.
