Preface

The 1977 *Annual Reports* exhibit the same kind of coverage as seen in the 1976 volumes. However, in view of the suspension of the non-viable *Specialist Periodical Reports* titles covering much of inorganic chemistry, it is planned to increase the treatment of those areas in Section A of the 1978 Reports. The Society's Books and Reviews Committee has also recognised that the present coverage of physical chemistry in *Annual Reports* is somewhat irregular and uneven and that possibly the literature needs of practising physical chemists are therefore not being met. Hence an investigation is being undertaken into the type of Reports desired by physical chemists, in particular the areas to be covered and the depth of the treatment, bearing in my mind the Society's existing *Specialist Periodical Reports* titles in this area. It is thus hoped to be able to determine in time for the 1979 *Annual Reports* whether a separate volume for physical chemistry would be feasible.

With these 1977 Reports Professor M. F. Lappert has completed his term of office as Senior Reporter for the Inorganic Chemistry part of Section A, and we thank him for his great efforts over the past three years. We welcome as a new Senior Reporter Dr. G. P. Moss who collaborates with his colleague Dr. J. H. P. Utley on the coverage and organisation of Section B, Organic Chemistry.

Contents

Part I Physical Chemistry

Chapter 1 Introduction	3
<i>By P. A. H. Wyatt</i>	
Chapter 2 Electrolyte Solutions	5
<i>By A. K. Covington and A. D. Pethybridge</i>	
1 Introduction	5
2 Conductance	6
3 Activity	13
4 Theoretical Studies	14
5 Water	16
6 Solvation and Related Topics	17
7 Concluding Remarks	21
Chapter 3 Solid Electrolytes	23
<i>By M. D. Ingram and C. A. Vincent</i>	
1 Introduction	23
2 Theory	24
Structure	24
Models of Ionic Motion	25
Simple Hopping Motion	25
Co-operative Motion Models	26
Quasi-liquid Sublattice Models	27
3 Experimental Measurement of Ionic Conductivity	28
Rapid Screening Methods	32
4 Silver Ion Conductors	33
5 Copper Ion Conductors	36
6 Indium(I) and Thallium(I) Conductors	38

7 β-Alumina and Related Electrolytes	39
β -Alumina	39
Related Electrolytes	41
8 Other Alkali Metal Ion Conductors	42
9 Proton Conductors	45
10 Fluoride Ion Conductors	47
Fluorite Structures	47
Tysonite Structures	48
11 Co-ionic Conductivity	49
Chapter 4 Luminescence of Organic Solids	51
<i>By J. O. Williams</i>	
1 Introduction	51
2 Anthracene and Other Polynuclear, Aromatic Hydrocarbons	53
Steady State Studies	53
Time-dependent Studies	57
Photochemistry	61
3 9-Cyanoanthracene, Pyrene, and Related Excimeric Emitting Systems	64
4 Stilbenes, Styrenes, and Polyphenols	67
5 Heterocyclic and Hetero-aromatic Systems	68
Nitrogen Heterocyclics	68
Aromatic Carbonyl Derivatives and Related Systems	69
6 Polymeric Systems	70
7 Other Systems	71
8 Applications of Novel Techniques	72
Double Resonance and Related Techniques	72
Optical 'Hole-burning'	74
Circularly Polarized Luminescence Spectroscopy	75
Chapter 5 Studies of Molecular Motion in Liquids and Solids using Low Frequency Dielectric Relaxation and related Techniques	77
<i>By G. Williams and J. Crossley</i>	
1 Introduction	77
2 Glass-forming Molecular Liquids and Glasses	80
Range $T > T_g$	80
Range $T < T_g$	84

Contents

ix

3 Other Low Frequency Relaxation of Liquids	85
4 Liquid Crystals	87
Introduction	87
Dielectric Relaxation	87
Kerr-effect Relaxations	90
Dynamic Light Scattering	91
Magnetic Resonance Studies	91
5 Molecular Crystals	92
6 Polymers in Solution	93
Introduction	93
Theoretical Studies	93
Dielectric Relaxation	94
Kerr-effect Relaxation	95
Light Scattering Studies	96
Fluorescence Depolarization Studies	97
N.M.R.	98
7 Polymers in Bulk	99
Introduction	99
Theoretical Studies	100
Dielectric Relaxation	101
N.M.R. Relaxation	102
E.S.R. Spin-probe Studies	104
Piezo-electric Relaxation and Related Phenomena	104
8 Conclusions	104

Part II Inorganic Chemistry

Chapter 6 Introduction.	109
<i>By M. F. Lappert</i>	
Chapter 7 The Typical Elements	111
Part I: Groups I and II	111
<i>By R. H. Cragg</i>	
1 Group I	111

Part II: Group III	114
<i>By G. E. Toogood</i>	
1 Boron	114
Boranes, Substituted Boranes, and Borane Anions	114
Theoretical Studies	114
Transmission of Electronic Effects in Boranes	117
N.M.R. Spectroscopy and Cage Boron Compounds	118
Metalloboranes, Carbaboranes, and Related Compounds	121
Metalloboranes	121
Tetracarbon Metallocarbaboranes and Carbaboranes	124
Metalloodicarbaboranes	128
Boranes, Carbaboranes, and Related Species containing Sulphur, Selenium, or Tellurium	129
Metal Tetrahydroborates	131
Octahydrotriborates	132
Metal Borides	133
Diboron Halides	134
Boron–Nitrogen Compounds	136
Rotation about B–N Bonds	136
New Boron–Nitrogen Compounds	136
Boron–Sulphur Compounds	137
2 Aluminium, Gallium, Indium, and Thallium	137
Aluminium	137
Theoretical Considerations of Aquated Al^{3+}	137
Aluminium Trihalide–THF Interactions	138
Gaseous Complexes of Aluminium, Gallium, and Indium Halides with Transition Metal Halides	139
Gallium	139
Gallium Citrate Complexes	139
Indium	139
Chloro- and Aquochloro-indate(III) Complexes	139
Electrochemical Behaviour of Indium Metal	140
Thallium	140
Thallium Complexes	140
(i) Tl^{III}	140
(ii) Tl^{I}	140
Part III: Groups IV and V	140
<i>By J. D. Smith</i>	
1 π-Bonding between First and Second Row Elements	140
2 B-Group Metal Clusters	143
3 Oxyanions	145
4 Ylides	147

<i>Contents</i>	xi
5 Phosphorus–Nitrogen Compounds	152
6 Difluorophosphino Derivatives	155
7 Monomeric Compounds of Ge^{II} and Sn^{II}	156
8 Trifluoromethyl Derivatives of Nitrogen and Phosphorus	157
Part IV: Groups VI–VIII	159
<i>By R. H. Cragg</i>	
1 Group VI	159
2 Group VII	165
3 Group VIII	167
Chapter 8 Chemistry of the <i>d</i>- and <i>f</i>-Block Metals	169
Part I: The Transition Metals	169
<i>By J. R. Dilworth, G. J. Leigh, and R. L. Richards</i>	
1 Introduction	169
2 Macrocyclic Ligands	169
Metal–Porphyrin Complexes	169
Titanium	169
Niobium and Molybdenum	170
Manganese and Rhenium	171
Iron	171
Cobalt and Rhodium	175
Copper	176
Complexes of Dinucleating Ligands	177
Aspects of the Chemistry of Complexes with Macrocyclic Ligands	179
3 Small Multiply-bonding Nitrogen Ligands	182
4 Dithiocarbamato- and Related Complexes	190
5 Iron–Sulphur Cluster Complexes	197
6 Models for Copper Proteins	200
7 Polynuclear Metal–Sulphur Cluster Complexes	201
8 Complexes of Sulphur Dioxide and Related Ligands	204
9 Hydrosulphido-complexes	207
10 Photolytic Properties of [Ru(2,2'-bipyridyl)₃]²⁺ and Related Complexes	208

Part II: Scandium, Yttrium, the Lanthanides, and the Actinides	209
By K. W. Bagnall	
1 Scandium	209
2 Yttrium and the Lanthanides	209
3 The Actinides	211
Chapter 9 Organometallic Compounds	215
By C. J. Cardin, D. J. Cardin, R. J. Norton, and K. R. Dixon	
1 Introduction	215
2 Groups IA and II	215
3 Organo-actinides	217
4 Groups IVA, VA, and VIA	218
5 Group IB	221
6 Group IIB	223
7 Group IIIB	223
8 Group IVB	224
9 Group VB	225
10 Metallocyclo-alkanes and -alkenes	227
11 Cyclometallation Reactions	232
12 Carbene and Carbyne Complexes	235
13 Carbene Analogues	237
14 Transition-metal Ylide Complexes	239
15 Metal–Carbon Multiple Bonds	241
16 Transition-metal Alkenyls	243
17 Paramagnetic Species	246
18 Photochemistry	248
19 Syntheses involving Metal Atoms	250
20 Carbonyl Complexes	251
Synthesis	251
Radical Species and Mechanisms	254
Structure and Bonding	255

<i>Contents</i>	xiii
21 Fluxional Processes	256
Carbonyls	256
Organometallic Complexes	258
Metal Hydrides	259
22 Isocyanide Complexes	260
23 Catalytic and Related Reactions of Complexes containing Metal–Metal Bonds	262
24 Theoretical Studies of Organometallic Complexes	264
25 Synthesis and Structure of Organometallic π-Complexes	266
Author Index	275

Section B, Organic Chemistry, contains the following items

- 1 Introduction. By J. H. P. Utley and G. P. Moss
- 2 Physical Methods and Techniques
 - Part (i) Mass Spectrometry. By T. P. Toubé
 - Part (ii) X-Ray Crystallography. By B. M. Hursthouse and S. Neidle
 - Part (iii) Ultraviolet and Visible Spectroscopy. By P. S. Song
- 3 Theoretical Chemistry. By G. Klopman and P. Andreozzi
- 4 Reaction Mechanisms
 - Part (i) Pericyclic Reactions. By R. J. Bushby
 - Part (ii) Polar Reactions. By H. R. Hudson
 - Part (iii) Electron Spin Resonance Spectroscopy and Free Radical Reactions. By A. T. Bullock
- 5 Arynes, Carbenes, Nitrenes and Related Species. By S. A. Matlin
- 6 Organometallic Chemistry
 - Part (i) The Transition Elements. By A. Stewart, D. J. Thompson, and M. V. Twigg
 - Part (ii) Main-group Elements. By M. G. Hutchings
- 7 Electro-organic chemistry. By R. Lines
- 8 Photochemistry. By H. A. J. Carless
- 9 Aliphatic Compounds
 - Part (i) Hydrocarbons. By D. R. Taylor
 - Part (ii) Other Aliphatic Compounds. By R. S. Ward
- 10 Aromatic Compounds. By R. G. Coombes
- 11 Heterocyclic Compounds. By A. J. Boulton
- 12 Alicyclic Compounds. By A. Cox
- 13 Synthetic Methods. By G. Pattenden
- 14 Biological Chemistry
 - Part (i) Monosaccharides. By P. M. Collins
 - Part (ii) Insect Chemistry. By R. Baker and D. A. Evans
 - Part (iii) Tetrapyrroles and their Biosynthesis. By D. G. Buckley
 - Part (iv) Enzyme Chemistry. By M. C. Summers and D. C. Williams
